M – Maestro | O<sup>2</sup> – Organize + Operationalize | D<sup>3</sup> – Data-Driven Deliverables

WHEN SYSTEMS DISAGREE — WE DECIDE.

## OUR MISSION

To shine a light by supporting charitable works, training people, and building solutions that strengthen organizations and communities.

### ✗ THE PROBLEM

- ✗ Disconnected systems produce conflicting results.
- ✗ Decisions are slow, inconsistent, and risky.
- ✗ Too much data. Not enough direction.
- ✗ Outcomes lack proof, traceability, and trust.

### ✓ THE SOLUTION

- ✓ MO<sup>2</sup>D<sup>3</sup> unifies competing outputs into one defensible decision.
- ✓ Deterministic structure — not guesswork.
- ✓ Every decision tested against truth, constraints, and risk.
- ✓ Clear. Consistent. Defensible. Executable.

## WHY MO<sup>2</sup>D<sup>3</sup> WORKS

**DETERMINISTIC**  
Eliminates ambiguity and competing narratives.

**CONSTRAINT-AWARE**  
Decisions respect real-world limits.

**PROOF-FIRST**  
Every outcome is traceable, explainable, and auditable.

**HUMAN-CENTERED**  
Technology that protects dignity and empowers people.

- ✓ **DETERMINISTIC**  
Not guesswork.
- ✓ **DEFENSIBLE**  
Every decision proven.
- ✓ **ALIGNED**  
Systems that agree.

## HOW WE WORK

**1 UNDERSTAND**  
We learn your goals, systems, and constraints.

**2 MODEL**  
We map relationships and test scenarios.

**3 DETERMINE**  
We identify the optimal, defensible solution.

**4 DELIVER**  
We implement with confidence and clarity.

- ✓ **HUMAN-CENTERED**  
Technology that serves.

## SMART DRILLING SYSTEM

# SEE THE SYSTEM. DRILL WITH CONFIDENCE.

BRYDTEN turns surface data into subsurface intelligence so you can make better decisions—faster.

### THE CHALLENGE

Fragmented data and delay hide the real downhole state.

Complex multi-lateral wells increase uncertainty and risk.

Missed signals lead to inefficiency, NPT, and reduced ultimates.

### THE BRYDTEN ADVANTAGE

- Unified view of the complete downhole system
- Earlier detection of instability and inefficiencies
- Smarter adjustments, less trial and error
- More consistent performance across the pad
- Maximize recovery and reduce cost per barrel

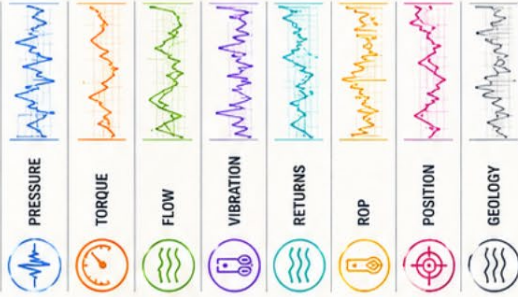

**WE APPLY OUR BACKBONE TO YOUR SYSTEMS**  
**WE DON'T REINVENT—WE ENHANCE.**  
BRYDTEN integrates with your current intelligent systems to organize and optimize the way they work.

- ✓ ORGANIZE DATA
- ✓ OPTIMIZE PERFORMANCE
- ✓ UNLOCK REAL VALUE

### BRYDTEN INTEGRATES WHAT OTHERS ISOLATE

One system.  
Clearer picture.  
Smarter decisions.

### HOW IT WORKS

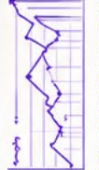

**MULTI-SOURCE REAL-TIME DATA**  
Capture signals from across the operation

**BRYDTEN INTEGRATION ENGINE**  
Advanced observer model connects the dots and reconstructs the truth

**UNIFIED SUBSURFACE VIEW**  
See the system others can't. Understand what's really happening downhole.

**ACTIONABLE INSIGHTS**  
Predict issues, optimize performance, and reduce uncertainty.

**SMARTER DECISIONS BETTER RESULTS**  
Higher recovery. Lower cost. Stronger wells.

**BETTER WELLS BETTER RETURNS**  
Maximize value across every barrel.
